Mismanagement Somewhere

The scare with regard to the lights Wednesday night did not come off. The arches of the two boilers have been defective for some weeks. Cement for repainting same was supposed to have been in town for some time. On Wednesday an attempt was made to repair one of the arches but it was found that there was not enough material to complete the job. In the meantime the part put in was spoiled. Result town without water for a time. Cause culpable negligence.

The Story of the A. & G. W.

In the summer of 1908 negotiations were in progress between the City of Kansas City and the Rutherford government which in the winter session of 1909 was crystallized into legislation providing for the building of the Alberta & Great Western Railway from Edmonton to Fort McMurray with branches, about 350 miles, the government guaranteeing the bonds of the railway to the extent of \$2,000,000, amounting to \$7,000,000 with an additional \$400,000 for terminals. The railway company was organized in July of that year and in agreement entered into by the Rutherford government which a short time previous had gone to the country and had been returned with a sweeping majority. The bonds were sold and \$600,000 were placed in the Royal Bank, \$1,000,000 in the Dominion Bank and \$500,000 in the Bank of Montreal, which sums were to be checked out upon the approval of the minister of railways.

In February, 1910, opposition arose to the legislation and agreement, led by Hon. W. H. Cushing on the grounds that the road would be 99 miles instead of 350, that the specifications did not call for a good road, that the guarantee was to be paid before the road was built, that the bonds were under no obligation to complete the road nor to incorporate it when completed, that someone had made \$740,000 out of the road, the difference between the par value of the bonds deposited in the banks and the 110 and 115 at which these bonds were sold. The result of this defection from the government ranks led to the resignation of Hon. Rutherford and the appointment of Premier Sifton, in May, 1910. The report of a royal commission which had been brought down before the resignation of Hon. Rutherford characterized the business as imprudent but found no wrongdoing on the part of any member of the government. In December 1910, legislation was brought in by Premier Sifton forcing the agree-

ment because the company had defaulted in some particulars. The banks refused to turn the money involved over to the province. The provincial court upheld the government, the supreme court of the province of Alberta upheld the government upon the appeal of the banks but when the case was taken to the privy council in England in December, 1912, the legislation was declared ultra vires. This decision was based solely on the contention that a provincial government has no power to affect the rights of those living outside of the province.

On Tuesday of this week, an act was introduced to repeal the act of 1910 which declared the amount in the banks which had been deposited as the result of the sale of the A. & G. W. bonds with interest accrued, to be part of the revenue of the province. It then ratifies and confirms the provincial guarantee of the bond issue amounting to \$7,400,000 and authorizes the provincial treasurer to issue and deliver the bonds to the bondholders' trustees as soon as same shall have been certified by a trustee to be exchange for the single interim bond of \$7,400,000 heretofore issued. The banks holding the money are authorized to pay over the money to such other banks as directed by order-in-council. The provincial treasurer is empowered to execute, on behalf of the province, an agreement indemnifying any bank from which the moneys are transferred against the claims of the bondholders. Upon the act coming into force the province will be entitled to receive from the A. & G. W. the interests on the proceeds of the bond issue up to July 31, 1913, and upon such amount being received all defaults of the railway will be waived and annulled. It also provides for an amendment to the A. & G. W. charter providing that the work shall be commenced on or before the 31st of December, 1913, and be finished within two years of that date. Thus the very points which were urged by the insurgent leaders are carefully provided for and a very vexed question will be settled. This is a very different solution from the one presented by the opposition at various times during the past three years and upon the assurance of the premier it is satisfactory to the province and to the bondholders, to the banks and to everybody. It is to be sincerely hoped that this will be a creditable chapter is closed.

The Provincial Finances

Edmonton, Sept. 30.—The total debt of Alberta at the present time is \$15,744,081, divided as follows: Bonded indebtedness, \$6,980,200; treasury notes, \$7,533,333; bills payable to banks or otherwise, \$971,500; overdrafts, \$276,048. This was the answer given Leader of the Opposition McEwen by Premier Sifton in reply to questions in the legislature this afternoon.

Since the last session of the legislature two releases of treasury bonds had been made one for \$7,200,000, December 30th next and \$240,333 due April 1st, 1914. The financing was done through Lloyd's bank the rate of discount being 3 per cent.

Preliminary Announcement of the Great Fall and Winter Opening Sale at the J. M. Soby Departmental Store

Nine Reasons for Good Roads

Mr. C. O. Reins, Master of the Missouri State Grange, gives the following reasons why farmers should have good roads:

- The possibility of securing quick medical assistance in the event of sickness in the family.
- The ability of children to attend school regularly, although possibly living a considerable distance from the school house.
- The possibility of the family attending church and enjoying social intercourse with their neighbors and friends, both in country and in town.
- The possibility of utilizing time during bad weather by attending to business and social duties away from home both day and night.
- The enlarged rental value of the farm.
- The ability to market produce when it is scarce, because those living on bad roads cannot get to market.
- The increase in tonnage in the hauling of produce to market and the return haul of family necessities.
- The increase in the value of the farms by many dollars per acre, and the possibility of selling with a readiness not known to those holding lands not adjacent to good roads.
- The importance given to the country by reason of its being inhabited people who build and maintain good roads with pleasure and profit to themselves.

Let Us Sell Your Grain

If you want the full market value of your grain, ship by our lots to Fort William or Port Arthur; have your shipping bills read "NOTIFY MONARCH GRAIN COMPANY, WINNIPEG," and send same to us by mail with your selling instructions. FUTURE OF WEST

Mixed Farming Will Greatly Increase
Agricultural Prosperity

Mr. F. Macleure Scanderson, commissioner of Saskatchewan recently said: "The farming crops in Central Saskatchewan are of the pioneering agricultural type, viz., wheat, oats, barley and flax. Every new district starts with such crops; in due course mixed farming is thereafter evolved. It is interesting here to remark that practically everything we have so far accomplished in this Great West has been done with such pioneering crops, which, as all who are familiar with agriculture will know, are the least profitable that can be raised upon the land."

"Take wheat, for instance, and then remember that it involves the annual summer following of one-third of our agricultural land. Think of about one-third of the cultivated land in this West doing and producing absolutely nothing each year! And then imagine if that is possible, what this West will be when even 50 per cent. of our arable land shall be producing not merely wheat but also the infinitely more profitable crops which may be grown anywhere in a similar latitude, and which we have conclusively demonstrated can be produced here to very remarkable advantage."

"It is very encouraging for those who have the best interests of our country at heart to contemplate the splendid increase in the growing of oats and barley. The increased production of such crops confirms the fact that our people have at last awakened to the wisdom of mixed farming, and to the necessity of working twelve months of the year on the farm, just as business men must do in their offices."

MIXED FARMING

Is the Need of the West Says Premier Bifton

Premier Bifton of Alberta who has been in east lately, reported as having told a Toronto newspaper man that mixed farming is the great need of the Canadian West. In part he said: "The Western Provinces will be even more prosperous when the farmers go in for mixed farming. Our demonstration farms are fast bringing this view home to the minds of the farmers with conviction."

"There is an economic reason for improving this trade on the minds of the farmers. It is this. All grain farming is speculative. If weather conditions, and all else, remained favorable from year to year, grain farming would have no evils. But one year the crops are all A No. 1; then comes a poor year; next, an average year; and then a big year; then a failure. Under such conditions a man may be rich one year and a pauper another. But if the farmers went in for mixed farming, other crops besides grain and cattle and horses, there would be a balance of fortunes, and Western farmers would always be in a well-to-do position, with nothing to worry about."

Premier Bifton admitted that some of the discontent in the West was caused by the farming "bug." He said, "on the whole the farmers are satisfied with the land and with the climate. Those who grow most are the speculative farmers who want to get rich quick and fall to do so."

HAMILTON FACTORIES

Immense Growth of Industries Under the National Policy

Hamilton, Ontario, known throughout the world as one of Canada's great industrial cities, has been celebrating its centennial. One by one, the city has magnified new industries, until today, it has 254 factories and shops, representing capital invested of \$28,000,000 and turning out products every year worth over \$22,000,000.

A large number of United States companies have their Canadian branch plants in Hamilton, and several others have their congressional eyes turned that way. The citizens and the city industrial officers have the knack of steering prospective manufacturers to the so-called Ambitious City, which now deserves a new nickname, having realized so many of its high ambitions.

A table gives statistics of the industries of Hamilton as compiled during the latest census. The figures show that over 19,000 people are employed in the factories of Hamilton, where they earn \$27,878. The cost of the raw material used by the 254 industrial establishments in 1910 was \$24,000,000. Hamilton makes everything from a paper bag to a lawnmower machine, from a biscuit to a boiler, from a bottle of "pop" to a railroad bridge. It is a city of diversified industries as the census facts show.

CANADA GAINS MUCH BY AMERICAN FACTORIES

Leading New York Newspaper Shows What Migration of United States Plants Means

(From New York American)
A reporter of The New York American in Stonington, Conn., writes to tell us that he has read Governor Foss's statement about the driving of 500 millions of capital out of the country because we do not pursue the policy of reciprocity, and he asks: "What kind of capital is it? Is it money? credit, real estate, intellect or pure manual labor?"

When a factory moves from New England to Canada, our loss is all of these. The wages, which support American homes and stores, go to support foreign homes and stores. The real estate comes on the market for sale. The intellect that runs the business and as many of the workmen as can follow the business and help to build up a foreign city. Credit also goes, for the American city and America are deprived of just so much assessable value.

Suppose that a small town is supported entirely by one big factory and that the factory moves away. The town will vanish, too.

The removal from the country of a big factory is a very real thing, a very real loss; not merely an occasion for theorizing.

HOW MANY PLANTS IN YOUR RIDING?

Questions For Members of Parliament
Who Are Considering Tariff

It is suggested by Industrial Canada that every member of Parliament who is considering the tariff issue should ask himself and his electors the following set of questions fraught with vital import to the future of his constituency and Canada at large. The questions are:

1. How many factories are in your constituency?
2. What amount of capital is invested?
3. How many people are employed?
4. What is the annual output?
5. Where does each manufacturer get his raw material and what duty does he pay on it?
6. What protection has each manufacturer on his finished product?
7. What is the difference between the duty on each manufacturer's finished product and the duty on his raw material, which difference is his real protection?
8. Where does each manufacturer sell his product and what competition does he have to meet? What advantage would his competitors gain by a reduction in the tariff?
9. What is each manufacturer's wage roll?
10. Where is this wage spent?
11. What proportion of the in habitants in each city, town and village in your constituency are factory employees or dependent upon factory employees?
12. What proportion of the increase in the population of your constituency during the past ten years is due to the growth of manufacturing?
13. How many British and foreign companies have established factories in your constituency during the past ten years?
14. How much British and foreign capital is invested in manufacturing in your constituency?
15. How many immigrants are attracted to your constituency by the hope of getting positions in factories?
16. How much farm produce is consumed annually by the factory population of your constituency?
17. What are the special transportation problems of the manufacturers in your constituency?

HARD ON LABOR

Free Trade Sacrifices Workmen Fully

United States and German manufacturers continually underbid British steel manufacturers for large contracts in Australia, Africa, South America, China and other parts of the world. In these instances the British wage-earner is sacrificed to no purpose. In a vain effort to undersell the products of protected labor in foreign countries his employer pays him a low first trade wage. Such expansion of foreign trade as the United Kingdom does enjoy is too often at the expense of the ordinary workers in factory, mill and foundry. The time cannot be far distant when the workmen of the Old Land will rise against the Cobden doctrine that trading should be done for the masses of laborers. They are going to try protection as a means of securing steadier work and better wages, and of generally improving their own condition.

Trouble for Threshing Outfits

Several mishaps have dogged the outfits of some of the threshers in this vicinity, small breaks and larger ones shutting down temporarily some of the machines. Some misadventure did damage to the outfit of Thos. Ellison, west of town. His machine was standing without a watchman some distance from any house and in the night some palkeys were damaged and other parts of the engine injured. An example should be made of any perpetrators of like vandal acts if the offenders could be located.

Rebekahs Social Evening

Invitations are out for a social evening to be spent by the Rebekahs and their guests at the L. O. O. F. Open House tomorrow night. Dancing and cards will help out the amusement and refreshments will be served.

Warning Notice to Water Users

Customers, using the town water service, who are in arrears are warned that unless arrears are cleared by the Secretary-Treasurer of the town or before Friday, October 10th, their service will be cut off. This will be rigidly enforced and these arrears must be paid to ensure the continuance of the service.

By order,

J. F. Reynolds,
Sec. Treas. Town of Claresholm.

Special Notice to Ratepayers

The Council have instructed the Secretary-Treasurer to continue until October 15th, the period during which the rebate of 5 per cent will be allowed on taxes. To take advantage of this discount, ratepayers must settle on or before this date.

Notice to Trespassers

Any persons found trespassing on the premises of John Stevenson will be prosecuted according to law. No shooting allowed on these premises. John Stevenson.

TERMS

\$12 to insure. Anyone disposing of mares will be held responsible for service. Owner not responsible for accidents.

Thos. D. Lewis, Owner.
Claresholm Alberta.

HARNESS Collared

uneconomically and with a badly fitting collar does more injury to your horse than you are aware of. When you buy a harness get one that will give your horse comfort while he is working, and at the same time get a reliable, strong and well-made harness or collar by buying at Kingsley's.

Repairs Promptly
Attended To

Application for Lease of Road Allowance or Surveyed Highway

Notice is hereby given that John Francis Cunningham, of Grannum, has made application to the Minister of Public Works, Edmonton, for a lease of the following road allowance or surveyed highway, viz:— That portion of the road allowance between the north-west quarter of Section 31, in Township 9, and Range twenty six, (26), West of the fourth meridian, and the south-west quarter of Section Six (6), in Township ten (10), and range twenty-six (26), west of the fourth meridian, lying west of Willow Creek.

Any protest against the granting of the above mentioned lease must be forwarded to the Minister of Public Works, Edmonton, within thirty days from the date of this notice.

Dated at Grannum, this 18th day of September, 1913.
J. F. Cunningham,
by his solicitor, Thos. Gillespie.
